QUADRUM CYBER

RISK MANAGEMENT PROGRAM
DATA SHEET · SEPTEMBER 2026

Are your cyber investments actually moving the dial?

The Risk Management Program is a consultant-led cyber risk engagement: 19 assessment activities, run on a recurring cadence by one team, quantified in financial terms, with the tooling included.

WHY TODAY'S APPROACH FALLS SHORT

Compliance lens, not risk lens

Measured against control checklists, not against what is actually exposed.

One-off projects, not a program

Bought separately from different vendors, in formats that never trend or integrate.

Investment without evidence

Leaders cannot say what the last dollar bought, or where the next should go.

WE NEED TO MANAGE CYBER RISK DIFFERENTLY

Verified
~~Assumed~~

Evidence from assessments run against your environment.

Continuous
~~Point-in-time~~

A recurring cadence, so posture has a trend line.

Quantified
~~Technical~~

Exposure in dollars, so trade-offs can be defended.

THE RISK MANAGEMENT PROGRAM

One program. One team.
One cyber risk picture.

Nineteen assessment activities spanning your digital, cyber and physical footprint, delivered on a set cadence, scored on one methodology, and contextualized by seasoned cybersecurity consultants.

- Cyber risk quantified in financial terms your CFO and Board understand
- One scoring, trending and reporting model across all 19 activities
- Consultant-led analysis and articulation — findings arrive in context
- All tooling and licenses included; ingest telemetry you already have
- Next best actions ranked by exposure reduction per dollar spent
- Ransomware and privileged access built in, not bolted on later

BUILT AROUND HOW BREACHES ACTUALLY HAPPEN

59% human element
Phishing, social engineering and email gateway testing

34% third parties
OSINT, external threat intel and cloud posture review

30% vulnerability exploit
Internal, external and web application assessments

20% stolen credentials
Privileged account controls and ransomware review

Three tiers. One methodology.

Meets you where you are.

Start at Core and grow into Plus and Enterprise as your organization's needs and capabilities mature. The methodology, scoring and reporting stay identical across tiers, so you maintain risk trending context.

CORE
Entry-level tier — **12** activities

- Remote delivery, consultant in the middle
- Cyber risk quantification built in
- Comprehensive controls effectiveness measurement, not just controls compliance

PLUS
Mid-level tier — **16** activities

- Remote and on-site delivery
- Adds backup, privileged access, wireless, physical, social vectors: SMS, QR, Deepfake
- 1 internal + 1 external verification scan / quarter

ENTERPRISE
Enterprise-grade tier — **19** activities

- Remote and on-site delivery
- Adds board insights, ransomware and cloud review
- 2 internal + 2 external verification scans / quarter

PROGRAM ACTIVITIES BY TIER

A shield marks the tier at which an activity becomes included.

	PROGRAM ACTIVITY	CORE	PLUS	ENTERPRISE	FREQUENCY
1	Business Profile Review	●	●	●	Annual
2	Cyber Risk Quantification (CRQ)	●	●	●	Up to Quarterly
3	External Vulnerability Assessment	●	●	●	Quarterly
4	Internal Vulnerability Assessment	●	●	●	Up to Quarterly
5	Endpoint Security Configuration Assessment	●	●	●	Up to Quarterly
6	Web Application Security Assessment	●	●	●	Up to Quarterly
7	Email Gateway & Filtering Assessment	●	●	●	Up to Quarterly
8	Phishing & Social Engineering Assessment	●	●	●	Up to Quarterly
9	Firewall Rules Assessment	●	●	●	Up to Quarterly
10	Open Source & External Threat Intelligence	●	●	●	Up to Quarterly
11	Policy, Process and Controls Assessment	●	●	●	Annual
12	Quarterly Executive Risk Briefing	●	●	●	Quarterly
13	Backup Process Review		●	●	Up to Semi-Annual
14	Privileged Account Controls Review		●	●	Up to Semi-Annual
15	Wireless Security Assessment		●	●	Up to Semi-Annual
16	Physical Security Inspection		●	●	Annual
17	Executive and Board Intelligence Insights			●	Semi-Annual
18	Ransomware Susceptibility Assessment			●	Annual
19	Cloud Security Risk Assessment			●	Quarterly

QuadRMP Certification

Organizations that consistently meet or exceed program requirements across assessment cycles are eligible to earn QuadRMP certification. *Demonstrate independent, evidence-based proof of programmatic cyber risk management for boards, insurers and customers.*

Tooling included with the program

The Risk Management Program includes all the best of breed tools to support the various assessments.

No separate licenses or tools to buy. The program also has the ability to ingest data from your supported tools.
